DEAR COLLEAGUES,

I am pleased to invite you to participate in the **5th International Video Forum on Pulmonology** to be held in Madrid on **January 15-16, 2026**.

The **Pulmonology Video Forum** is a novel, participative and current project in which we will review the importance of interventional techniques in pneumology today, visualizing in videos how the techniques are performed.

We will address the different topics with expert speakers who will present and base their interventions on audiovisual formats, i.e. videos of daily clinical practice, allowing attendees to appreciate the most relevant technical aspects of each procedure.

Another key aspect of the project is the plural dimension that we want all the sessions to have. We want the participation and opinions of all participants to enrich everyone's training experience. Thus, we will give special importance to debates, discussions and controversies.

This is the fifth edition of this initiative, and we are confident it will be of great interest.

We look forward to seeing you in Madrid!
